FLOW PACK PACKAGING MACHINES

Little Flow

The wrapping machine designed to fully satisfy all requirements of low cost, easy operating, reliability, versatility.

Small size to be suitable for a use in very small production areas.

Applications: Little Flow can be used in different manufacturing sectors, such as food, industrial and pharmaceutical. Ideal for the wrapping of single and one-dose packages.

Easy 4/5/6

Mechanical flow wrapping machines designed to offer high performance, versatility and easiness of operation.

Applications: ideal for industrial, food, pharmaceutical markets.

Easy 4 - ideal for single and one-dose packages and for small size trays.

Easy 5 - suitable to be used in confectionery and bakery fields .

Easy 6 - ideal for the wrapping of big items and multipack. Best application in different manufacturing markets such as food, industrial and pharmaceutical.

Dynamic

Electronic flow wrapping machine, designed to satisfy high performance as well as easiness of operation.

Applications: Dynamic machines have been designed to be used in a wide range of manufacturing areas—food, technical, pharmaceutical, etc. being suitable to pack small as well as big size items and multipack.

FLOW PACK PACKAGING MACHINES

New Easy 6

The "Mectronic" flow wrapping machines that combines simplicity of electronics with reliability of mechanics.

Equipped with brushless twin motors to increase production performance.

Applications - it can be used in all manufacturing sectors with products as different as food, industrial and pharmaceutical.

New Easy 6 is ideal for packaging of small items, multi-pack, and large items.

New Easy 6 BB

The "Mectronic" flow-wrapping under reel machine that combines simplicity of electronics with reliability of mechanics.

Equipped with brushless twin motors to increase production performance.

Applications - it can be used in many different manufacturing sectors, such as food, industrial and pharmaceutical.

The machine is ideal for wrapping of shapeless, unstable and heavy items, as well as for the traditional multipack.

New Easy 6 BS

The "Mectronic", flow-wrapping machine that combines simplicity of electronics with reliability of mechanics in a single system.

Equipped with brushless twin motors to increase production performance.

Applications: suitable for all production areas such as food, pharmaceutical, technical, etc.

It is ideal for packaging of small items, multi-pack, and large items.

FLOW PACK PACKAGING MACHINES

Sfera

FULL ELECTRONIC flow wrapping machine.

Mechanics with triple motorization to guarantee high production performances.

Operator's friendly touch screen interface.

Applications: many different production areas such as technical, pharmaceutical, food, etc.

Sfera is ideal for packaging of small items, multi-pack, and large items.

Atmosfera

The "mectronic" flow wrapping machine for modified atmosphere packaging.

Twin motors fitted to increase the machine production performances..

Electronics allows setting all parameters adjustment via touch screen interface, for easy format changes.

Applications: all those production fields that require a modified atmosphere packaging.

It is ideal for packaging of small items, multi-pack, and large items.
