

# DVCS-BR

## VERTICAL AUGER FILLER

Vertical auger filler with electronic functioning.

**Applications** - powder and grains.

**Electronic command** through Siemens PLC S7.

**Brushless motor** auger rotation to guarantee high performances and electronic resolution digital weight with recipes record.

**Versions:** semi automatic and automatic.

**The system includes:**

- strong steel frame in aluminium anticorrosive
- touch screen TFT 4" to set all parameters and menu
- loading hopper in stainless steel AISI 304 with inspection window
- auger in stainless steel AISI 304
- easy auger assembly replacement in case of chute change
- Electronic shaker in the hopper with single or double towels with separated motor
- capacity level sensor mounted on the hopper to keep a steady product level during the functioning

TECHNICAL FEATURES	DVCS-BR
Max weight	20-5000 gr. (according to auger diameter and kind of product)
Accuracy	+/- 1-1,5%
Output	Up to 3000 dos/h (according to kind of product and weight)
Absorption	1,9 Kw
IP	IP54
