SEALING PARAMETERS CONTROL - NEW ELECTRONIC MAIN BOARD TO GUARANTEE AN UTMOST ACCURATE, FAST AND STABLE TEMPERATURE, TIME AND PAUSE INTERVAL CONTROL.

THE FAN SUCKS AIR OUT FROM INSIDE OF THE SEALER, THIS MAKES THE TEMPERATURE VERY STABLE ALONG THE ENTIRE LENGTH OF THE SEALING BARS AND ALSO ALLOWS TO EXPEL ANY RESIDUAL POWDER PRESENT INSIDE THE SEALER.

TEMPERATURE ALARM $\pm 5^\circ\text{C}$ COMPARED TO SET TEMPERATURE.

RELIABILITY - SEALING PROCESS ONLY ALLOWED WHEN THE SEALER HAS COMPLETED THE HEATING PHASE AS THE BARS DO NOT CLOSE UNTIL THE SET TEMPERATURE HAS BEEN REACHED.

DIGITAL DISPLAY - NEW ALPHANUMERIC LCD WIDE AND CLEAR DISPLAY, WITH 1 LINE AND 16 CHARACTERS.

MULTILINGUAGE INTUITIVE MENU.

SETTINGS - POSSIBILITY TO SET BOTH TEMPERATURE AND TIME, ADJUSTABLE AT THE TENTH OF A SECOND.
